Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The frame house is a two-story frame structure constructed in a L-shape plan. It has a four-bay by two-bay main section with a two-bay ell. The main facade has a full-length, one-story porch. The house is constructed on a sloped bank so that the foundation level is a full-story level on the main facade. The porch is supported by brick piers covered in lattice-work. The frame structure is covered in a diamond-shaped asphalt siding. The main facade has an entrance in the second bay from the west, two-over-two sash windows in the other bays on the first and second story, and a bracket cornice. The structure appears to date from the mid-19th century.

The property is located on the north side of Sandy Hook Road, approximately .1 mile west of Clark Road, in Sandy Hook. The site is terraced with a brick retaining wall in the front yard and another two stone retaining walls along the side and at the rear of the house. The main facade faces south.

The two-story structure is constructed of frame covered in a diamond-shaped asphalt siding. The stone foundation rises a full story in the front of the house. This full story is enclosed by the brick piers and lattice-work at the foundation level of the front porch. The first story of the front porch has square posts with a paneled railing. The entrance is located in the second bay from the west. Two-over-two sash windows are located in the other bays of the main facade on the first story and in the four bays on the second story. The windows are located in the two bays on each story of each gable end. There is a bracket cornice on the front of the house. The gable roof is covered in sheet metal and has an interior-end brick chimney at the east gable end. The west gable end is where the ell meets the house and has a side entrance. A single window is on the first and second floors of the west gable end.

There are no significant outbuildings on the property.

8. Significance

Survey No. WA-III-100

Period	Areas of Significance—Check and justify below			
<input type="checkbox"/> prehistoric	<input type="checkbox"/> archeology-prehistoric	<input type="checkbox"/> community planning	<input type="checkbox"/> landscape architecture	<input type="checkbox"/> religion
